Roadside mowing services are required in all nine districts.

The rates the Contractor proposes will be in effect for the complete term of the contract. Once under contract, specific work assignments will be coordinated with an authorized representative of VTrans or the District Transportation Administrator in the District for which work is to be performed.

Note: Depending on the assignments, payment will be based per hour rates or a per acre amount agreed upon by the Contractor and the VTrans authorized representative. *When considering the use of the per acre payment, VTrans shall ask for a per acre proposal from 3 or more contractors before assigning the work to a specific contractor.*

All questions related to this RFP shall be forwarded to **Bonnie Sanders, AOT Contracts Specialist, in writing** to the address above, by e-mail at [Bonnie.Sanders@vermont.gov](mailto:Bonnie.Sanders@vermont.gov) or by fax at (802) 828-5545. **ROADSIDE MOWING**  
**2016 ANNUAL MAINTENANCE RENTAL AGREEMENT**

**SCOPE OF WORK**

November 2015

Work shall consist of providing tractor(s) with operator and mowing attachments to be used for mowing roadsides on the State highway systems (interstate and non-interstate). Mowers shall have the ability to operate on steep slopes and/or to mow on the back side of guardrail sections. Contractors may propose one or both types of mowers (regular and over the rail).

The Contractor shall provide suitable equipment to accomplish at least 15 to 20 acres of roadside mowing per day. The Contractor shall provide all work zone signing and adhere to the following policy on Traffic Control for mowing operations:

1. Part 6 (Temporary Traffic Control) of the *2009 Edition of the Manual on Uniform Traffic Control Devices (MUTCD)* ([http://mutcd.fhwa.dot.gov/kno\\_2009r1r2.htm](http://mutcd.fhwa.dot.gov/kno_2009r1r2.htm) ) establishes the traffic control standards and guidelines for street and highway maintenance operations.

Because the equipment may travel on or across the roadway, all mowing equipment shall be equipped with the following:

- A. A minimum of one high intensity strobe light mounted to provide 360 degree visibility. Light shall emit a minimum of 1 million candlepower.
- B. A triangular slow moving vehicle sign visible from the rear of the tractor/mower.

2. All mowing operations shall be signed with the advanced warning sign in each direction. These signs shall have a minimum size of 48 x 48 inches. These signs may be **MOWING AHEAD**, **MOWING AHEAD** with a supplemental plate stating **NEXT [X] MILES** or a combination of these signs. The warning signs shall cover a work area no greater than three (3) miles long. An **END MOWING OPERATIONS** sign shall be erected at the end of the mowing operations. Unless protected by guardrail or other positive barrier, signs shall be erected on yielding or breakaway supports that meet the requirements of NCHRP Report 350.

**Interstate and Limited Access Highways:**

1. Advance warning signs shall be gate posted or erected on both sides of the highway. Where mowing is in the median and the mowing equipment will be in the clear zone of both directions of travel, signs shall be erected for both directions of travel.

2. When mowing operations include an interchange, additional signage should be erected on the entrance ramps.

3. When mowing equipment cannot be contained in or beyond the shoulder, the adjacent lane shall be closed in accordance with Standard E-103.

4. Service vehicles shall not be parked in the travel way or on the shoulder. They may be parked in U-Turns during mowing operations. No other vehicles shall be parked within the highway right of way.
5. Mowing equipment shall be parked a minimum of 30 feet from the edge of pavement or 6 feet behind guardrail when not being used.

**Other Highways:**

1. The lack of sufficient shoulder width on these highways often requires that mowing operations be done from the traveled way. As shall all mowing operations, such mowing operations shall comply with Part 6 of the *2009 Edition of the Manual on Uniform Traffic Control Devices (MUTCD)*.
2. Where a paved public highway with a painted centerline intersects the roadway within a mowing operation, additional **MOWING AHEAD** signs should be erected at the intersection to alert drivers that they are entering the work zone.
3. Mowing equipment should be parked as far from the edge of pavement as possible when not in use.

The Contractor shall furnish the required equipment, operators and other employees to the State at the rates indicated in the attached rates or for a lump sum amount agreed upon by the Contractor and the State's authorized representative. Labor rates will be furnished as per hour and per acre.

Specific work assignments will be coordinated with an authorized representative of the State in the District for which the work is to be performed.

The work shall be done under the direction of the Maintenance Programs Engineer, Operations Division or authorized representative of VTrans.

The Contractor shall work with the State and other support equipment, if necessary. VTrans will negotiate costs for any equipment that may be required due to site specific conditions.

Additional equipment may be added to the contract without an amendment.

Additional districts may be added without an amendment.

All work shall be done to the satisfaction of the State's representative, and, to the extent applicable, in accordance with the Vermont Agency of *Transportation's 2011 Standard Specifications for the Construction Book* and all other State, Federal, and Agency Standards, Policies, and Specifications.

**ATTACHMENT B**  
**PAYMENT PROVISIONS**

1. All overhead costs, including expenses, lodging, meals, etc., must be incorporated into the Contractor's hourly rate. Should mobilization apply, an hourly rate is a one-time charge for transporting equipment to and from the work site and listed as a separate line item. Equipment subsequently moved to and from the work site for the convenience of the Contractor will not be considered for reimbursement.
2. Unless otherwise directed by the State's representative, Contractor will submit a bill or invoice every two weeks unless otherwise directed by the representative of the State.
3. Bills or invoices submitted by the Contractor shall identify the contract number under which the work is being performed, as well as any project number(s) assigned by the representative of the State.
4. Whenever possible, The State shall provide materials for the work through its normal procurement channels. Disposal of removed materials shall be the responsibility of the State.
